Notes:

- Use A+CAD to sketch **(Front view, Top view, right side view & isometric view drawings)** the following examples in the required dimensions/units. Use separate layer thickness for the dimension, sketch and hatching. **Isometric view should not be dimensioned**.
- **Assignment can be turned in as a hard copy**, **use the template that you had developed**. You **could also print screen the A+CAD screen (with the template you had developed in the first class) and paste into a word document and then submit it on BB**. Please see the next page.
